SIR:

Please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend claims 19-22, 24-27, 29, 30, 33 and 36 to read as follows:

--19. (Amended) A system of light units, which have different light emission properties, each light unit comprising;

a support structure;

at least one hollow light guide with a cavity;

at least one lamp for directing light into the cavity;

one or more optical components having light directing properties for influencing the beam path of the light output from the lamp;

at least one of said optical components being a light permeable component having a medium with a first index of refraction and having a boundary surface with a medium of a second index of refraction different from the first, said light permeable component being part of said light output device and said boundary surface being provided with a light-refractive structure for deflecting light in at least one plane directed
